We partner with the world's most valuable brands to build digital solutions that transform businesses. As a digital native, we bring a 29-year track record of accelerating business impact through complete and scalable digital solutions. With a global presence of 6,000+ professionals in strategy, research, data science, design, and engineering, we unlock top-line growth, improve customer experience, and drive operational efficiency. Hi there, this is Dara from CI&T! I am a Talent Attracting Analyst looking for a **Senior Fullstack - Java and Angular**, Developer located in **Brazil**. **Your mission** Serve together with CI&T a big international consulting focused on logistics that take care of multi-modal transport. We are working on a project to modernize a large system. Our team implements new features on a completely new rail management platform for an American train company. Our requirements are written by business analysts and are based on the current systems the company uses. We have a large and extremely collaborative team. The work experience is incredible and provides real opportunities for growth and learning. If you are a dynamic person, want to work with software being written from scratch, have experience in implementing well-designed and functional interfaces, you are in the right place! **You need experience with:** Development of interfaces, modernization of interfaces following a design system, development of new functionalities specified by the Business Analysts of the projects; - Experience with **Java Springboot** and/or **Angular**; - Knowledge in design patterns, unit tests, object orientation, database design, SQL and JPA is expected; - Ability to communicate well: **English** doesn't have to be perfect but listening and speaking is very important as the project has complex scenarios. **You will stand out if** - you have experience in mentoring
