Role overview

We are seeking a skilled Full Stack Developer with a focus on advertising technology (AdTech) to join our dynamic team. As a Full Stack Developer, you will play a key role in building robust APIs, integrating with various partner APIs, and contributing to both backend and frontend development. Our ideal candidate is well-versed in advertising technology, possesses a strong background in API development, and is comfortable working in a startup environment.

Duties and Responsibilities

Develop and maintain APIs, with a particular emphasis on advertising technology.

Collaborate with multiple partner APIs to ensure seamless integrations.

Leverage tools such as Snowflake, Python, and AWS for backend development.

Utilize frontend technologies including API, React, and data retrieval from S3 buckets.

Work closely with cross-functional teams to understand and address project requirements.

Ensure timely availability to meet the dynamic needs of our startup environment.

Exhibit leadership qualities, having led or managed developers in a team setting.

Requirements

Minimum 5 years of experience as a Full Stack Developer.

Proven expertise in backend development using tools such as Snowflake, Python, and AWS.

Strong understanding of frontend technologies, including API and React.

Experience with data retrieval from S3 buckets.

Familiarity with advertising technology and API development in an AdTech context.

Ability to work effectively in a startup environment with minimal supervision.

Demonstrated leadership skills; experience leading or managing a team of developers is a big plus.

If you are a self-motivated, experienced Full Stack Developer with a background in advertising technology, we invite you to apply. Join us in shaping the future of digital advertising.

Benefits

Reasonable time off with manager approval

Local holidays

5 sick days
