(.NET/C#) Engineer - JT

Apply Now

Company: Gorilla Logic

Location: Colombia

Category: computer-and-mathematical

Gorilla Logic provides nearshore Agile teams to Fortune 500 and SMB companies, bringing unparalleled expertise in the delivery of full-stack web, mobile, and enterprise applications. Our highly collaborative Agile Gorillas are uniquely qualified to implement complex software initiatives. With offices in the United States, Costa Rica, Colombia and Mexico, Gorilla Logic helps clients gain competitive advantages to achieve results faster. **Backend Engineer (.NET/C#)** Gorilla Logic is looking for a Mid Backend Developer with exceptional web services and other backend development skills to work as a member of an Agile team responsible for building and maintaining our client's web and/or mobile applications. Our environment will require you to work effectively with your teammates, of course. But your real success will be measured by how well you couple critical thinking with self-motivation, enthusiasm, and determination. **Responsibilities** \*Work with an agile team to build, maintain and optimize our client's applications\*Work with DevOps and QA to build a quality focused CI/CD pipeline\*Responsible for code reviews, testing and delivery of high-quality maintainable code\*Work in an Agile environment to define, estimate and work user stories\*Proficient English and communications skills required\*Good analytical thinking and problem-solving skills **Technical Requirements**\*Bachelor's degree in Computer Science, Engineering, or equivalent experience\*3+ years of backend development experience with .NET/C# and/or .NET Core\*Strong API development and integration background (JSON/SOAP/WCF/REST/XML)\*Development experience with ORM like Entity framework and/or NHibernate\*Experience with modern enterprise patterns like microservices\*Development experience with SQL (Microsoft SQL preferred)\*Familiar with older

.NET frameworks and Visual Basic\*Experience writing and optimizing complex SQL queries\*Demonstrated experience building and maintaining a production application**Bonus Skills** \*Development experience with a modern framework like Angular, React and/or Vue\*Cloud development experience with Azure and Application Insights\*Familiarity with modern architectural modalities like serverless, JAMstack, event-based, pub/sub, and data streaming\*Container experience with Docker/Kubernetes\*Travel industry experience
