18437875367 - LatAm Senior Full-Stack Engineer (Data Focused)

Apply Now

Company: Support Shepherd

Location: Bogotá

Category: architecture-and-engineering

Fully remote, Only for LATAM !!

Position: Full-Stack Developer

Salary Range USD 3000

Location: Fully remote, Only for LATAM

Working Hours: Full-time

Language: Professional proficiency in English level C1 is required.

Type of contract: Independent Contractor Agreement.

At Shepherd, we're committed to connecting businesses with skilled and cost-effective talent from the Philippines and Latin America. We tailor our services to match our client's unique business needs, making global recruitment a breeze.

Scope of the Role:

As a Senior Full-Stack Engineer with a focus on data, you'll be the cornerstone of our engineering team, leading the charge in solving complex problems, building robust tools, and enhancing our data infrastructure. Your passion for coding and creating end-to-end solutions will be critical in driving our technology forward.

Duties and responsibilities:

Engage in full-stack development, working with Ruby on Rails, React, TypeScript,

PostgreSQL and AWS to build scalable applications.

Lead the development of our data warehouses, ETL pipelines, and analytics tools, with

an emphasis on YouTube and other social video platform metrics.

Construct and maintain our data layer to support the building of dynamic reports and

dashboards for internal stakeholders and external partners.

Tackle complex coding challenges and develop innovative solutions to enhance data

processing and analysis.

Spearhead the creation and implementation of proof of concepts (POCs) to explore
new

technologies and improve existing systems in a fast-paced environment.

Provide technical leadership and mentorship within the team, promoting a culture of

excellence and collaborative problem-solving.

Qualifications:

Requirements

Strong foundation in data engineering, with hands-on experience with AWS ecosystem

(AWS Step Functions, AWS Glue, AWS Redshift, AWS Quicksight, SNS topics,
AWS

Lambda, etc)

● Proficiency in database design and query optimization.

● Demonstrated expertise in full-stack development with a portfolio of projects
showcasing

your problem-solving capabilities.

● Proficiency in Ruby on Rails, Python, JavaScript (React) and/or TypeScript

● A history of working with agile project management tools and methodologies.

- A passion for coding, a relentless problem-solving mentality, and an eagerness to develop tools that address complex real-world challenges.

Preferred Skills:

- Previous experience building data engineering pipelines at scale.

- Previous work with video content analytics or related fields.

- Experience in leading projects from conception to deployment, with a focus on delivering user-centered solutions.

- Hands-on experience with Typescript
