

## AIX Administrator

[Apply Now](#)

Company: Unisys

Location: Bogotá

Category: computer-and-mathematical

**Installation and Configuration:** Setting up AIX on servers, configuring system parameters, and ensuring proper integration with hardware components.

**System Monitoring and Maintenance:** Monitoring system performance, resource usage, and responding to alerts or system failures. This includes applying patches, updates, and performing routine maintenance tasks.

**User Management:** Creating and managing user accounts, setting permissions, and ensuring security protocols are in place.

**Storage Management:** Managing disk storage, configuring filesystems, and ensuring data integrity and availability.

**Backup and Recovery:** Implementing backup solutions, scheduling regular backups, and testing recovery procedures to ensure data protection and business continuity.

**Network Administration:** Configuring network interfaces, managing network settings, and troubleshooting network-related issues.

**Security:** Implementing security measures such as firewalls, intrusion detection systems, and access controls to protect against unauthorized access and ensure compliance with security policies.

**Performance Optimization:** Tuning system parameters, optimizing resource usage, and

identifying opportunities for performance improvements.

Documentation and Reporting: Maintaining accurate documentation of system configurations, procedures, and troubleshooting steps. Generating reports on system performance, usage trends, and security incidents.

Collaboration: Collaborating with other IT teams, such as application developers, database administrators, and network engineers, to ensure seamless integration and support of business-critical applications and services.

#LI-AS2

**You will be successful in this role if you have:**

4 – 6 years of proficiency in AIX administration, including installation, configuration, and troubleshooting.

4 – 6 years of strong understanding of Unix/Linux fundamentals, including shell scripting, file systems, and system utilities.

2- 3 years of experience with AIX performance tuning and optimization techniques.

2 -3 years of knowledge of AIX security best practices, including user management, access controls, and security auditing.

2 -3 years of understanding of storage concepts and experience with AIX storage management tools.

2 -3 years of knowledge of backup and recovery solutions for AIX systems.

**Nice to Have**
