Company: Nubank

Location: Bogotá

Category: computer-and-mathematical

About Nu

Nu was born in 2013 with the mission to fight complexity to empower people in their daily lives by reinventing financial services. We are one of the worlds largest digital banking platforms, serving millions of customers across Brazil, Mexico, and Colombia. our institutional page

About the role

As Analytics Engineers at Nubank, we are the bridge between the business needs and the data platform. We make data available to the entire company, always thinking about the best modeling, governance and performance. In addition, we share best practices and create new tools so that everyone who consumes the data can work in a more organized, efficient and secure way.

We have some links to help you better understand our Analytics Engineers team:

You will be responsible for

Manage data projects from requirements mapping to database modeling and delivery;

Contribute to the design, documentation, maintenance, monitoring and optimization of our code, and data tools;

Identify opportunities for improvement in our ETL/ELT platform.

Translate business needs into solutions aligned with data platform tools and strategies;

Negotiate a data strategy with stakeholders that can deliver a great impact;

Act in mentoring team members and data literacy at Nubank.

We are looking for a person who has

Be passionate about data;

Be able to write queries in SQL to solve highly complex problems in an optimized way;

Experience in implementing and maintaining data pipelines;

Understanding of software engineering good practices (eg Documentation, automated tests, clean code, etc);

Programming experience with general-purpose languages

Knowledge of different database modeling and architecture techniques for analytical purposes (e.g. Data Mart, Data Lake, Data Warehouse etc.)

Knowledge about distributed data systems and parallel processing;

Ability to abstract business concepts into quantitative metrics (e.g.. KPIs, OKRs etc.)

Good communication skills in dealing with stakeholders from technical and business areas;

Knowledge in data visualization tools such as Looker, Power BI, Tableau, etc.

Advanced English
