Consultancy Lead (Generative AI)

Apply Now

Company: SoftServe

Location: Colombia

Category: computer-and-mathematical

WE ARE

SoftServe is a global digital solutions company with headquarters in Austin, Texas, founded in 1993. Our associates are currently working on 2,000+ projects with clients in the USA, Europe, APAC, and LatAm regions. We are about people who create bold things, make a difference, have fun, and love their work.

We are transforming the way thousands of global organizations do business by developing the most innovative technologies and processes in Big Data, the Internet of Things (IoT), Data Science, and Experience Design.

We are one of the largest teams in Eastern Europe that stood at the origins of Data Science, so you will get tons of experience while working with the best talents in the field.

In a Data Science Center of Excellence, you will contribute to a wide range of projects in different areas, domains, and technologies.

IF YOU ARE

Qualified with a PhD or Master's degree in Computer Science, or a related field

Professional in Generative AI technologies, leading the development and implementation of strategies

Understanding client needs, and guiding them on leveraging Generative AI for innovative solutions

Leading and executing projects involving LLM models and applications

Leading a team of AI experts during client engagements to showcase the capabilities and advantages of LLM's

Hands-on with Generative AI techniques and aware of its technical and logical aspects

Proficient in SoTA in Machine Learning, Deep Learning, and their application to solving complex problems

Aware of the software development life cycle of AI projects and Machine Learning operationalization processes

Experienced in AI solutions deployment to cloud providers: GCP, AWS, or Azure

Well-versed in Python

Adapting complex Generative AI concepts into clear explanations to non-technical audiences

Qualified in Big Data solutions and advanced data tools in Cloud Platforms

Utilizing MLOps best practices (specifically for LLM models), for data manipulation, experiment design, developing analysis plans, and generating insights

A holder of solid interpersonal, analytical, and problem-solving skills

Capable of maintaining business and technical communication with teammates and clients in English

AND YOU WANT TO

Design project scope, and roadmap, estimate analytical and deployment efforts

Work closely with clients to understand their business needs and provide recommendations on how to best leverage data to improve business outcomes

Take on business challenges through innovative Generative AI applications

Lead and participate in AI workshops, discoveries, and initial engagements with clients

Develop and deliver comprehensive proposals and architectural visions that incorporate LLMs

Interpret analysis results as well as contribute to the proposals and architecture vision

delivered to the customer

Work with a diverse range of clients, across industries and sectors

Use the latest technology and tools in the field of Generative AI and LLMs

Collaborate closely with clients to understand their challenges and offer strategic Generative AI solutions for impactful business outcomes

Have the possibility to work with the latest Generative AI tools and algorithms, staying at the forefront of technological advancements

TOGETHER WE WILL

Communicate with world-leading companies, contributing to expanding our portfolio and winning new clients

Work as a team of highly skilled professionals passionate about exploring and implementing cutting-edge Generative AI solutions

Participate in international events, gain certifications in state-of-the-art technologies, and grow professionally

Benefit from robust educational and mentorship programs tailored to Generative AI expertise
