

# Colombia Jobs Expertini®

## Data Analyst

[Apply Now](#)

Company: Skalo

Location: Colombia

Category: computer-and-mathematical

### What do we do?

At **Skalo Tek**, we offer data and artificial intelligence consulting to organizations from different industries in order to help optimize decision-making by improving the capture, analysis and application of the data they have. We have a line of business in the educational sector where we have two solutions: SkaloSupport and SkaloScan. With SkaloSupport we facilitate the generation of support strategies in the classroom and personalization of the Individual Reasonable Adjustments Plan format. With SkaloScan, we provide a comprehensive view of student performance, integrating and analyzing academic, behavioral and social-emotional data using AI, to facilitate accurate and timely educational decisions.

### Who are we looking for?

We are looking for a data analyst who shares our dedication to excellence and innovation in business and education transformation. We value the ability to manage complex projects in parallel, proactivity in self-learning, an approach oriented towards effective and recursive solutions that directly address the needs of our clients and with high attention to detail.

**Person with specific knowledge and experience in data analytics, database management and Python.**

**Experience in using Business Intelligence tools such as PowerBI, Tableau, Looker, among others.**

**Experience in using pandas, numpy, matplotlib libraries, among others.**

**Intermediate - advanced Excel management.**

**Good relationship and communication skills.**

**It is a plus that you have knowledge of Artificial Intelligence tools.**

**It is a plus that you know how to connect to APIS to extract data.**

**It is a plus that you have knowledge of cloud solutions (AWS, GCP, AZURE)**

**What do we offer you?**

Remote work and sometimes in person when required.

Salary negotiable between 2.5M - 4.5M depending on your skills and experience

Friendly work environment

Training and continuous training

Growth opportunity

**What will you do with us?**

You will prepare data sets for analysis by cleaning and transforming them with Python and other ETL tools.

You will examine large data sets to identify trends, patterns and correlations to deliver valuable insights to clients.

Analyze and propose improvements to clients based on insights that increase the efficiency and effectiveness of processes.

You will create data visualizations and interactive reports to communicate findings in an understandable way to non-technical stakeholders.

You will participate in the design and training of AI models to automate processes, improve decision making and generate value from data.

You will work as a team and with clients to ensure data analytics and AI projects align with business objectives.

You will be with us in the office in person when required
