

## Data Developer SR

[Apply Now](#)

Company: Unreal Gigs

Location: Colombia

Category: computer-and-mathematical

The Data Developer is a dedicated professional enthusiastic about constructing technological solutions that encompass the entire data lifecycle. Their primary focus lies in data ingestion, transformation, governance, organization, and provisioning, ensuring efficient and secure data management.

### Requirements

#### Responsibilities:

Develop and deploy data pipelines to collect and ingest information from diverse sources.

Design and maintain ETL (Extraction, Transformation, Loading) systems to uphold data integrity and quality.

Contribute to defining and implementing scalable and resilient data architectures.

Ensure the performance and optimization of data systems, striving for continuous enhancement.

Collaborate with the team to uphold best software development practices throughout the data lifecycle.

Stay abreast of data technology trends, emerging tools, and methodologies.

#### Requirements:

Substantial experience in a Data Developer role, with proficiency in Kusto Query

Language (or other DB Query) and PowerBI.

Solid understanding of monitoring systems concepts.

Proficient hands-on experience in developing Grafana dashboards.

Good grasp of Azure Cloud and its ETL components like Azure Data Factory and Databricks.

Advanced or fluent English for effective business communication.

**Nice-to-haves:**

Experience with Airflow.

**Benefits**

**Our Benefits:**

Competitive salary range: R\$70,000 - R\$110,000 annually.
