JAVA (TDD) - Senior Software Engineer

Apply Now

Company: Publicis Global Delivery

Location: Bogotá

Category: computer-and-mathematical

Job Description

We are looking for highly talented and enthusiastic professionals that are passionate about Code Quality, Continuous Delivery and Continuous Improvement. You will have the opportunity to work together with our clients, in a distributed agile environment, where leadership is required but also built along a senior team.

Responsabilities:

Work closely with Creative, Business, Technology and QA teams to ensure the technology will be functional and meet performance targets

Own the development of sub-systems and ensure they follow the established technical architecture and design

Implement user and business requirements which are composed of multiple development activities or touch various sub-systems

Maintain concise and clear documentation on projects as dictated by each capabilitiess guidelines and best practices

Debug complex issues in existing software applications

Provide proactive feedback on policies and procedures when an opportunity for improvement exists

Perform code reviews and enforce coding guidelines and best practice

Qualifications

English level B2 or higher (the work is 100% on english)

BS in Computer Science or related discipline, or equivalent practical experience

Between 3-6 years' software development experience

- Java/J2EE development experience
- JS/HTML/CSS/JSON (no specific library knowledge needed, just strong fundamentals and understanding)

Proficiency in designing and developing rich web applications using JAVA.

Proficiency with data storage patterns and practices, namely relational (SQL) and/or non-relational (NoSQL) platforms

Proficiency in integrating web solutions with web services and third-party platforms

Advanced-level knowledge of at least one back-end programming language and object-oriented analysis and design

Knowledge of design patterns (e.g. model-view-controller, observer, etc.) and software engineering principles

Capable of building a web solution based on a Content Management System or e-commerce platform

Capable of writing unit tests, and scripting load and performance tests

Capable of working with new technologies and building proof of concept prototypes

Capable of troubleshooting, debugging and doing root cause analysis of web platform issues
