MID SENIOR DEVOPS

Summary:

We are seeking a highly motivated and versatile DevOps Engineer to join our team in Medellín. The ideal candidate will be proficient in orchestration and CI/CD. Strong English skills are essential.

Responsibilities :

• Design, Develop and maintain infrastructure provisioning, deployment and configuration management with code, primarily using GitHub and orchestration.

• Collaborate with Platform Engineering on architecture and DevOps best practice to optimize developer productivity and accelerate platform/product delivery.

• Develop, configure, utilize and recommend application performance monitoring tools.

• Participate in architecture, design and code reviews for both DevOps and backend development.

• Identify and improve service level objectives (SLOs) working with product engineering teams.

• Collaborate with development, QA, and cloud operations teams to accelerate product and platform delivery.

Skills :

• 3+ years of progressive experience with DevOps practice, specifically GitHub, Kubernetes, and CI/CD.

• English B2+/C1

- Strong experience deploying and managing Kubernetes workloads preferably using helm.

- Demonstrated scripting and programming experience, preferably in Python and bash.

- Experience or knowledge in MySQL and AI and OCR is a plus.

- Experience with using collaboration tools like Jira and Confluence.

- Bachelor's or master's degree in computer science or equivalent experience.
