Company: DB Engineering & Consulting GmbH

Location: Colombia

Category: architecture-and-engineering

Job description

DB Engineering & Consulting is a part of the DB group, a world-leading global railway company with extensive organization in Germany and projects around the world. Our company offers technically sophisticated and customized infrastructure, mobility, and transport solutions. With our sustainable concepts, gained from our experience in project work for decades, we ensure the future success of economic regions, make important contributions to the protection of the environment, and help shape the world of the future. We represent 180 years of rail experience and our infrastructure projects connect continents. We set the standard for transportation and modernstrengthen our business development department, we are looking for a Planning Engineer and Track Alignment for Structural Engineering for our office in Bogotá or Medellín. **Responsibilities:**

Planning of track systems, drainage systems and platforms as well as other traffic systems in the context of new construction, expansion or repair measures ranging from feasibility studies to project delivery phases

Contribute when calculating the planning services/preparation of offers in the development of conceptual traffic planning

Checking the planning results of third parties (internal and external services) with regard to costs, deadlines and quality.

Generate 2D and 3D constructs by using suitable software.

Your profile:

Completed university education as a civil engineer or master's degree in infrastructure planning, transportation systems or similar.

0 to 5 years of professional experience in planning infrastructure (mainly railway and/or street) systems, especially in stations, platforms noise barriers, track systems, drainage bridges

Solid knowledge of planning infrastructure system facilities from preliminary design to detailed design

Well-founded IT knowledge (Office programs, AutoCAD, Revit, ProVI).

Interdisciplinary understanding and knowledge of the interrelationships between individual planning in infrastructure projects

Strong ability to work in a team

Flexibility, mobility, resilience

Own initiative and very good self-management

Previous experience in the infrastructure sector (mainly railway and/or street) will be considered as an asset

Ability to deliver the project in good quality and agree on a budget to committed deadlines

Fluency in Spanish and in English, German will be considered a strong asset

Willing to learn new skills and knowledge on an ongoing basis
