## Senior Automation Quality Assurance Engineer (#16059482)

Apply Now

Company: N-iX

Location: Colombia

Category: computer-and-mathematical

**Work type:**Office/Remote **Technical Level:** Senior **Job Category:** Quality Control **Project:**

Canada's leading online broker

**N-iX** is a software development service company that helps businesses across the globe develop successful software products. During 20 years on the market and by leveraging the capabilities of Eastern Europe talents, the company has grown to 2000+ professionals with a broad portfolio of customers in the area of Fortune 500 companies as well as technological start-ups. With its headquarters in Lviv, Ukraine, the company also has multiple development offices in the East European region and representative entities in the United States of America, Sweden, and Malta.

Throughout the years of its operations, the company has developed strong expertise in such fields as digital turn-key solutions engineering, cloud services, big data & analytics, user experience design, engineering excellence, digital platforms integration, and its own R&D in different domains such as financial services & banking, telecommunications, e-commerce, automotive, manufacturing, and others.

The modern global trends in the IT industry have led the company to consider its expansion to the Latin American market to complement its expertise with high-end talents in the area.

**The Senior Automation Quality Assurance Engineer** will provide expertise in the area of QA activities for applications developed by the Insurance Engineering Team. Particular focus will be on the insurance Web application, microservices and backend systems.

This individual will participate as an active part of an Insurance focused Agile SCRUM

team. The Senior Quality Assurance Engineer will be an individual who is very interested in technology, particularly backend systems and services and web applications. Enjoys being part of a team who builds great tools using leading edge technologies. This individual understands the concept of testability and will work together with engineers and designers, providing input into their work to ensure the final product can be tested efficiently using either manual or automated approaches.

### **Responsibilities:**

Write test plans and test cases throughout the development lifecycle

Ensure test plans thoroughly cover all requirements and use cases  
Plan, schedule and perform manual and automated software tests

Develop automated regression test suites using automated testing tools

Foster a continuous improvement approach to QA activities

Review tools implementations and encourage best practices and sound design principles while remaining practical and deadline driven

Work closely with Engineering team to perform early testing on components prior to integration builds

Manage defect tracking; monitor and report results

Report QA status, as appropriate, to keep project stakeholders informed on deliverables and timelines

Train other departments on the use of custom developed tools

### **Requirements:**

Solid knowledge in Javascript/Typescript. You have experience in Cypress

Experience in creating frameworks using BDD/TDD

Experience in Javascript driven testing tools is an asset.

Have experience in automation testing or coding or backend services is an asset.

Knowledge of SQL and NoSQL databases

Knowledge of Postman or any API testing tools

**Nice to have:**

Knowledge of software development life cycle, methodologies and testing

Knowledge of financial services, particularly within the insurance realm, which is considered an asset

Experience working in a fast paced agile environment

Experience with cloud technologies and modern pipelines are an asset

Knowledge of quality assurance techniques, testing concepts, methodologies and tools. You have expert ability to apply quality assurance knowledge to in-depth testing and test plans

Ability to apply concepts of unit, system, regression, product, integration and acceptance testing

**We offer:**

Flexible working format - remote, office-based or flexible

A competitive salary and good compensation package

Personalized career growth

Professional development tools (mentorship program, tech talks and trainings, centers of excellence, and more)

Active tech communities with regular knowledge sharing

Education reimbursement

Paid vacation days, sick leaves, and days off

Healthcare & Sport program

Medical insurance

Memorable anniversary presents
