Senior Backend Engineer

[Apply Now](#)

Company: LotusFlare, Inc.

Location: Bogotá

Category: computer-and-mathematical

Overview As a Senior Software Engineer within our Server Engineering team, you will work collaboratively with the Dev team as well as the Mobile Operator to help build a network stack to support millions of users. You come from a systems or development background (or are comfortable in both areas). You are self-directed and have the ability to track solutions from design through implementation, owning every step along the way. We strive for a deep understanding of the core technologies that are being used while building redundancy and establishing best practices. **Responsibilities** We've developed a platform that integrates with mobile client-side library and apps along with mobile network carrier systems. The Server Engineer would be responsible for further developing, securing, and scaling the backend infrastructure to support the platform in order to handle millions of concurrent API calls.

Requirements BA/BS in Computer Science or related technical field or equivalent practical experience 6+ years of work experience as a software engineer 4+ years of experience building secure scalable web services Good understanding of distributed systems and familiarity with SOA/ Microservices Understanding of data modeling in SQL and/or NoSQL environment Experience with AWS, Ansible, Kafka and Spark would be a plus **Perks** Competitive salary package. Yearly bonus. Trainings and workshops. Truly flexible working hours. **About LotusFlare** LotusFlare employees join and remain at LotusFlare for two simple reasons. First, they can see immediately that their work makes a positive impact on LotusFlare customers, and second, they grow on a personal level by developing best practices and experience in cloud-native enterprise software. LotusFlare Founder and CEO Sam Gadodia believes that if you want to make an impact and change industries for the better, you

should consider joining LotusFlare. LotusFlare has always been about making an impact through software products and changing industries for the better by simplifying technology to simplify the customer experience. Founded by the team that helped Facebook reach over one billion mobile users, LotusFlare was born out of a vision to make the mobile internet accessible and affordable to people in parts of the world who often did not have access. From this initial work, LotusFlare's mission now is to design, build, and continuously advance a cloud-native digital commerce and monetization platform that simplifies technology and customer experience to deliver valuable outcomes to enterprises. This platform provides the software product foundation for the company's main offering, the LotusFlare Digital Network Operator® Cloud. LotusFlare DNO™ Cloud is a digital commerce and monetization managed service that serves as a digital BSS to deliver valuable business outcomes for communications and media services providers. LotusFlare looks for people all around the world who are passionate about their aim to make an impact and change industries for the better by simplifying technology. Headquartered in the heart of Silicon Valley with offices in EMEA and APAC, LotusFlare serves Verizon, T-Mobile, Globe Telecom, MPIC, Digi, DISH Networks, Permata Bank, Singtel, Digicel, Supercell, and other leading enterprises around the world.
