

Colombia Jobs Expertini®

Senior Big Data Software Engineer

[Apply Now](#)

Company: SoftServe

Location: Colombia

Category: computer-and-mathematical

WE ARE

SoftServe is a global digital solutions company with headquarters in Austin, Texas, founded in 1993. Our team are passionate innovators working on over 2,000 cutting-edge projects around the globe from the USA and LATAM to the Asia-Pacific region.

Our Big Data & Analytics Center of Excellence is a data consulting and data engineering branch of SoftServe. Starting as a group of 3 enthusiasts in 2013, almost 200 Data Engineers and Architects nowadays build Data and Analytics end-to-end solutions from strategy through technical design and PoC to full-scale implementation.

We have customers in the Healthcare, Finance, Manufacturing, Retail, and Energy domains and hold top-level partnership statuses with all the major cloud providers. We also collaborate with many technology partners like Snowflake, Confluent, Cloudera, Starburst, Collibra, Tableau, and others.

Our client is a diversified resource company committed to responsible mining and mineral development with business units focused on steelmaking coal, copper, zinc, and energy.

They have expertise in exploration, development, mining, and minerals processing, including smelting and refining, health and safety, environmental protection, materials stewardship, recycling, and research.

IF YOU ARE

Competent in Python and PySpark

Proficient in working with Databricks Lakehouse architecture and principles

Possessing 2+ years of experience in designing data models, building ETL pipelines, and wrangling data to solve business problems

Well-versed in Azure cloud technologies and modern data estate components, such as Azure Data Factory, Azure DevOps, Azure Synapse, and Azure Data Lake Services

Skilled with advanced SQL working with relational databases

Knowledgeable of database and data warehouse design best practices

Experienced in designing, building, and scaling streaming and batch data pipelines

Good at finding the best solution among different options, conducting trade-off analysis, and solving problems

Capable of communicating with stakeholders in written and verbal form at the Upper-Intermediate English level

AND YOU WANT TO

Utilize Python, and PySpark for daily engineering tasks

Work with Azure cloud services and a range of cloud-based tools

Implement Generative AI with Databricks on different processes such as ETL, and data administration

Collect and analyze data through manual and automated collection methods

Identify patterns and meaningful insights from data through analysis

Analyze large data sets and translate abstract data into easily digestible visualizations

Participate in the entire project lifecycle, from initial design through PoCs and MVP up to the full-scale implementation

Work with major cloud providers' services which are not generally available yet

Engage with Customers from all over the world, from huge global corporations to crypto startups that are about to launch their first product

TOGETHER WE WILL

Gain certifications from leading providers (Google, AWS & others)

Empower you to scale your expertise with others by joining the Mentoring Program

Excel business of our clients from startups and ISVs to Enterprise and Fortune 500 companies

Create an exceptional customer experience and impact the company's global success and be recognized by Customer Hero Program

Care for your and your family's wellness with a health insurance package
