

Colombia Jobs Expertini®

Senior Data Scientist

[Apply Now](#)

Company: SoftServe

Location: Colombia

Category: computer-and-mathematical

WE ARE

SoftServe is a global digital solutions company with headquarters in Austin, Texas, founded in 1993. Our associates are currently working on 2,000+ projects with clients in the USA, Europe, and APAC region. We are about people who create bold things, who make a difference, who have fun, and who love their work.

Transforming the way thousands of global organizations do business by developing the most innovative technologies and processes in Big Data, the Internet of Things (IoT), Data Science, and Experience Design. We are one of the largest teams in Eastern Europe that stood at the origins of Data Science, so you will get tons of experience while working with the best talents in the field. In the Data Science Center of Excellence, you will receive a chance to contribute to a wide range of projects in different areas, domains, and technologies.

Gen AI Strategy at SoftServe aims to spearhead the development and implementation of intelligent software systems that integrate Gen AI, AI, Data Analytics, MLOps, and Cloud infrastructure.

IF YOU ARE

A holder of a or Master's Degree in Computer Science, or a related field

Experienced in Generative AI and NLP techniques: GANs, Transformers, and Diffusion Models for Image Generation

Competent in Generative AI and Language Models to spearhead innovative initiatives that leverage cutting-edge techniques in NLP and AI

An expert in Deep Learning techniques application, knowledgeable of all mandatory technical areas to use them successfully

Confident in SoTA in Machine Learning, Deep Learning, NLP, and their application to resolving intricate challenges

Working with pre-trained Language Models (GPT-3, BERT), and fine-tuning them for specific tasks

Aware of the software development life cycle of AI projects, and Machine Learning operationalization processes

Experienced with AI solutions deployment to main cloud providers: GCP, AWS, and Azure

Hands-on with Python and TensorFlow or PyTorch

Familiar with Big Data solutions and advanced data tools in Cloud Platforms (an advantage)

Developing and implementing ML models using Generative AI and LLM (nice-to-have)

Building and operationalizing ML models, including data manipulation, experiment design, developing analysis plans, and generating insights (as a perk)

Translating complex concepts to a non-technical audience in a clear way (Upper-intermediate, or higher level of English)

AND YOU WANT TO

Deploy in production Full Stack Data Analysis, Deep Learning, and Machine Learning model pipeline that includes deep analysis of customer data, and modeling

Apply decision-making regarding relevant computational tools for study, experiment, or trial research objectives

Lead the application of Generative AI techniques to develop innovative solutions for language generation, text synthesis, and creative content generation

Produce clear, concise, well-organized, and error-free computer programs with the appropriate technological stack

Present results directly to stakeholders and gather business requirements

Develop expertise in state-of-the-art Generative AI techniques

Maintain a synergy of Data Scientists, DevOps team, and ML Engineers to build infrastructure, set up processes and ML pipelines, and integrate them into existing business environments

TOGETHER WE WILL

Communicate with the world-leading companies from our logos portfolio

Work with the latest modern tools and technologies on various projects

Participate in international events and get certifications in cutting-edge technologies

Have access to strong educational and mentorship programs
