Company: SoftServe

Location: Colombia

Category: computer-and-mathematical

WE ARE

SoftServe is a global digital service and consulting company founded in 1993. We're working on 2,000+ projects with clients in the USA, Europe, APAC, and LatAm regions. Big Data & Analytics Center of Excellence, data consulting and data engineering branch of SoftServe. Starting as a group of 3 enthusiasts back in 2013, almost 200 Data Engineers and Architects nowadays build Data & Analytics end-to-end solutions from strategy through technical design and PoC to full-scale implementation. We have customers in Healthcare, Finance, Manufacturing, Retail, and Energy domains across North America, EMEA, APAC, and LATAM.

We hold top-level partnership statuses with all the major cloud providers and collaborate with many technology partners like Snowflake, Confluent, Cloudera, Starburst, Collibra, Tableau, and others.

Together with the SEI and Carnegie Mellon University, we adapted ADD and ATAM architecture design methodologies to Big Data needs and invented the Smart Decisions game to promote architecture design best practices in AI and Big Data.

Our client is a leading smart home technology provider that offers home security, energy management, home automation, local cloud storage, and high-speed Internet solutions to more than one million customers throughout the United States. Together we work on a smart home solution that saves time and money and simplifies life.

IF YOU ARE

Proficient in on-premises SQL Server management

Experienced in code tuning to optimize performance

Well-versed in SQL code reviews and deploying changes

Confident in managing backups and performing restores as needed

Good at providing support to developers for any database-related issues

Competent in managing SQL server updates to ensure system stability and security

Knowledgeable in T-SQL replication for data synchronization

Skilled in Azure (as an advantage)

AND YOU WANT TO

Bring your proficiency in on-premises SQL Server and Azure to enhance our database systems

Be engaged in code tuning and conducting SQL code reviews to optimize system performance

Lead data recovery and system update

Manage critical backups, restores, and SQL server updates to ensure system stability and security

Provide expert support to developers on database-related issues, by helping to streamline project workflows

Utilize your strong troubleshooting skills and oversee database user management and audits to maintain high operational standards

TOGETHER WE WILL

Support your technical and personal growth – we have a dedicated career plan for all roles in our company

Investigate new technologies, build internal prototypes, and share knowledge with the SoftServe Big Data Community

Upskill with full access to Udemy learning courses

Pass professional certifications, encouraged and covered by the company

Assimilate best practices from experts while working in a team of top-notch Engineers and Architect

Collaborate with world-leading companies and attend professional events

Have a chance to address different business and technology challenges, engage in challenging projects and top-notch technologies, and drive multiple projects and initiatives as a part of the Center of Excellence
