Senior DevOps Engineer (Azure)

Apply Now

Company: Gorilla Logic

Location: Colombia

Category: computer-and-mathematical

Gorilla Logic provides nearshore Agile teams to Fortune 500 and SMB companies, bringing unparalleled expertise in the delivery of full-stack web, mobile, and enterprise applications. Our highly collaborative Agile Gorillas are uniquely qualified to implement complex software initiatives. With offices in the United States, Costa Rica, Colombia and Mexico, Gorilla Logic helps clients gain competitive advantages to achieve results faster. **Senior DevOps Engineer**Gorilla Logic is looking for a Senior DevOps Engineer, who will work with a team of developers and engineers building infrastructure and CI/CD pipeline. Our environment will require you to work effectively with your teammates, of course. But, your real success will be measured by how well you couple critical thinking with self-motivation, enthusiasm and determination. **Responsibilities** *Set up and configure Azure DevOps services, including Repos, Pipelines, Boards, Test Plans, and Artifacts.*Design and implement CI/CD pipelines for automating the deployment of applications.*Manage source code repositories, branching strategies, and code merging.*Implement and enforce code versioning and branching best practices.*Build and maintain automated build and deployment pipelines.*Implement release strategies and coordinate releases across development, testing, and production environments.*Implement and manage infrastructure as code using tools like Terraform or ARM templates.*Automate the provisioning and configuration of infrastructure components.*Set up monitoring and logging solutions for applications and infrastructure.*Troubleshoot issues and implement improvements based on monitoring feedback.*Collaborate with development, testing, and operations teams to ensure smooth integration and delivery of software.*Communicate effectively with cross-functional teams

and stakeholders.*Security and Compliance:Implement and enforce security best practices in the CI/CD pipeline.*Ensure compliance with relevant standards and regulations.

Technical Requirements*Bachelor's degree in Computer Science, Information Technology, or a related field.*5 Years of experience as a DevOps Engineer or similar role.*Strong proficiency in Microsoft Azure services.*Experience with CI/CD tools, such as Azure Pipelines, Jenkins, or GitLab CI.*Proficiency in scripting languages (PowerShell, Python, Bash).*Knowledge of containerization and orchestration tools (Docker, Kubernetes).*Familiarity with infrastructure as code tools like Terraform or ARM templates.*Understanding of networking, security, and cloud best practices.*Excellent problem-solving and troubleshooting skills.*Strong communication and collaboration skills.

Bonus Skills * Cloud certifications and/or cloud native infrastructure experience* Experience building and managing applications with package/project managers like Maven/Gradle, Pip, NPM, Yarn* Experience with technologies like Jenkins, Gitlab CI, GitHub Actions or Circle CI* Experience with networking storage and release management* Linux foundation certificates* HashiCorp certifications
