Senior Drupal Engineer (Contract)

[Apply Now](#)

Company: Verndale

Location: Bogotá

Category: computer-and-mathematical

About the Senior Drupal Engineer (Contractor) Join Verndale, a leading digital agency specializing in innovative web solutions. We are seeking a seasoned Senior Drupal Developer to spearhead the development of a new website from scratch, working alongside a dynamic team of skilled developers. This role offers the unique opportunity to shape the digital landscape and deliver high-impact web applications tailored to client needs. The ideal candidate will have a strong understanding of Drupal architecture, PHP programming, and web development best practices

Qualifications Bachelor's degree in Software Development, Computer Science or related fields 2 – 4 Years of Web Application development experience Proven experience in web application development, particularly with PHP and Drupal. Strong understanding of Drupal theming and module development. Expertise in code quality best practices, with a focus on maintainability and performance. Experience with Drupal 9 or 10 is highly preferred. Responsibilities

Collaborate with a team to design and implement robust web applications from the ground up using Drupal. Develop custom Drupal themes and modules. Maintain high standards of code quality and ensure best practices are followed throughout the development lifecycle. Customize and theme Drupal environments to meet specific design and functional requirements. Optimize application performance to enhance user experience and manage system scalability. Stay updated with the latest versions of Drupal, implementing new features and functionalities as required. Cite Project Risks and Mitigation Plan. Innovate,

regardless of domain.Unblock TeamEngineering Work Breakdown and Estimation/Re-
