

## Senior Java/Angular Engineer

[Apply Now](#)

Company: AgileEngine

Location: Barranquilla

Category: computer-and-mathematical

### Job Description

AgileEngine is a top-ranking provider of software solutions to Fortune 500, Global 500, and Future 50 companies. Listed on Inc. 5000 among the fastest-growing US companies, we are always open to talented software, UX, and data experts in the Americas, Europe, and Asia.

If you like a challenging environment where you're working with the best and are encouraged to learn and experiment daily, there's no better place — guaranteed! :)

### What you will do

Build end-to-end solutions, implementing and designing both the GUI and the server-side designs with high efficiency and quality;

Participate in all phases of the software development lifecycle – requirements, architecture, design, development, testing, and deployment;

Participate in the project planning process including estimating and process improvements in an Agile environment;

Deliver solutions that are highly usable, efficient, secure, and scalable;

Strive at all times to do work using best practices – through experience or experimentation.

## Must haves

### Experience:

5+ years of experience with Java Enterprise Application development experience;

Demonstrate independent work and solutions;

Examples of independently building complex solutioning;

Solid skills – independent investigating and solutioning for software feature changes;

Experience developing Proof of Concepts for large enterprise applications;

### Java:

Solid Java experience;

Recent steady Java development. Able to hit the ground running;

Exposure to large solutions;

### Hibernate:

Current experience and knowledge with Lazy loading, eager loading;

Working with exceptions;

### Front-End:

Solid HTML, JavaScript and CSS experience;

### Database:

Be familiar with SQL Server Query Analyzer;

Querying multi-table complex data structures;

Experience writing complex queries;

Experience building solutions with large data-driven enterprise applications (lots of

tables, lots of data, lots of view, performance tuning, etc).

## Nice to haves

The education and experience. You have either a diploma or a degree in Computer Sciences, IT, or a related field and 5+ years of work experience in a development environment;

The tech exposure. Experience with most of the following technologies:

Tomcat, Apache;

HTML5, CSS3, JQuery, Bootstrap;

MSSQL Server;

Tableau, Salesforce, Crystal Reports;

RESTful API;

A perfectionist streak. You want to be part of a team dedicated to creating and delivering quality software. You define and follow best practices for web design and usability principles;

Outstanding communication. You will split your time between heads-down coding and team collaboration and innovation. We support each other out loud, working out solutions;

Pride. You enjoy your work and getting a job done well. You want to be part of a team that promotes their accomplishments and sees the difference they make;

Ownership. You can be counted on to deliver the best solution in collaboration with your team. You take ownership of your work, your tasks, your timelines;

Driven. You want to be challenged and you are constantly seeking new opportunities to learn, gain, and apply new skills and knowledge.

## **The benefits of joining us**

## Professional growth

Accelerate your professional journey with mentorship, TechTalks, and personalized growth roadmaps.

## Competitive compensation
