Senior Java EE Developer

[Apply Now](#)

Company: INVOWAY

Location: Colombia

Category: computer-and-mathematical

We want you on our team

INVOWAY is a company with operations in Europe and Latin America specialized in electronic invoice exchange processes between clients and suppliers. Our solution allows Corporate Financial Areas to automate their Accounts Payable processes in three simple steps: Reception, Approval and Accounting. bills.

We currently want to grow with our staff in Latin America, which is why we are looking for a **Java EE Developer** to work remotely in Colombia.

What will be your goal?

Use Java-Jee technologies to create efficient solutions that help optimize clients' business processes, understanding needs and translating them into technical requirements, designing solid software architectures and developing robust applications, ensuring optimal performance over time .

What is our work culture like?

We are a dynamic company, constantly growing, with development possibilities within the company. We are open to you having your contribution within the organization.

We care about offering quality of life to our collaborators, ensuring a balance between work and personal life.

What are the working conditions and benefits?

Undefined term contract directly with the company.

Training and continuous training plans.

Opportunity to work with the technology area in Spain.

Life insurance for collaborators.

100% Remote Work.

Excellent working environment.

What requirements must you meet?

More than 5 years of experience in software analysis and design: demand management, backlog management, design of functional specifications and data architectures.

Experience working under agile Scrum methodologies.

Experience in enterprise software development in Java-JEE environments.

Experience in software platform implementation and integration processes

Training in Systems, Software or related careers.

Knowledge of relational data model design tools.

Systems integration: web services, SOAP, REST, etc.

Configuration management tools: Jenkins, Subversion.

Ability to work autonomously.

Relational databases: ORACLE, PostgreSQL

It's a Plus!

Experience with Apache Tomcat application server.

Learning capacity.

Teamwork.

Excellent communication skills.
