

Senior .Net/AWS Solutions Architect

[Apply Now](#)

Company: LatamCent

Location: Bogotá

Category: other-general

is looking for an experienced Senior .NET/AWS Solutions architect to join our team for our cloud based .NET modernization practice.

Work Experience: 7+ years

Industry: IT Services

Job Type: FULL TIME

City: Remote in Latin America

Native Level English

Responsibilities:

Technical Lead and architect on projects consisting of migrations to cloud native technologies in the .NET ecosystem.

Collaborate with the sales support or account team by acting as technical experts in customer presentations.

Assess scope for migrating from .NET framework to .NET Core.

Contribute to automated migration pipelines and tooling.

Create proof of concepts that serve as the starting point for future production grade products.

Lead delivery teams in product builds.

Set the example for the rest of the team by implementing test driven development and utilizing SOLID design principles in practice.

Re-architect existing monoliths into micro services.

Architect solutions from the ground up.

Determine the technical requirements to meet client goals and act as liaison between the organizations sales/business development and engineering groups.

Required experience & skills:

7+ yrs of C# development.

Experience building and deploying containerized solutions to AWS.

Experience migrating .NET Framework application to .NET Core.

Hands-on expertise with core AWS Service API GW, ECS Fargate, S3, etc.

Hands-on experience with Infrastructure as Code, i.e. Terraform, Pulumi, CloudFormation.

Understanding of data security principles.

Strong analytical and problem-solving aptitude skills.

Strong understanding of SOLID design principles and reactive architectures.

Provide technical consultation for technology and data solutions based on business needs; oversee architectural aspects of business solution development/deployment.

Able to evaluate/analyze business needs and current technical assets/data to develop and implement solutions and strategy.

Perform platform planning and drive technical roadmap with stakeholders and vendors and suggest improvements to increase efficiencies and maximize product values.

Interact and communicate effectively with stakeholders, end users, and business subject

matter experts.

Create, maintain, and govern technical architecture depicting the Business and IT landscape in its current, transitional, and future state.

Ensure best coding practices are followed in the code.

Ensure continuous improvement in coding processes.

Work with external vendors, consulting partners, etc. to research emerging technologies and industry trends to define strategy for their applicability in alignment with strategic business direction.

Desired Skills:

Excellent interpersonal, communication, and teamwork skills.

Experience and ambition to work in a global setting.

Excellent problem solving and decision-making skills.

Knowledge of front and back-end technologies.

Ability to work as a team player and collaborate with cross-functional teams.

Any AWS professional certifications.
