Senior Software Engineer (.NET) Team Lead – OP0989-02

Are you in Colombia, Argentina, Brazil, Chile, or Costa Rica? Join us as we actively recruit in these locations, offering a comfortable remote environment. Submit your CV in English, and we'll get back to you!

We invite a highly capable Team Lead with .NET + Vue.js experience to join our team and help us develop, improve, and maintain innovative fintech products for our client, who is an industry-leading payment processing solution provider offering merchant services to over 275,000 businesses in the US. You'll lead one of the two delivery teams under a brand-new sub-project and will be in charge of providing support, ensuring collaboration within and between teams, and discovering opportunities for consistent improvement.

What's in it for you:

Enhance your general knowledge of the fintech domain and boost your technical expertise across a wide range of payment processing business areas

Advance your level of verbal and written English through continuous communication with US-based teams, stakeholders, and the client

Is that you?

5+ years' experience as a software developer or a similar role

5+ years' experience working on high-performing teams throughout the entire SDLC

Solid understanding of the design principles, threading, real-time processing, SQL Server DB

queries, and performance tuning

Demonstrated experience in coaching, building developer teams, and ensuring standards are aligned with the best industry practices

Experience developing in a cloud environment (Azure, GCP, AWS)

Microservices/REST API skills

Strong practical knowledge of .NET and Vue.js

Database experience (SQL)

Excellent communication, organizational, and leadership skills

Upper-Intermediate+ English level

Desirable:

Experience in leading, coaching, and training other developers to create a positive work culture

Experience performing peer performance reviews and providing constructive feedback

Key responsibilities and your contribution

You'll be leading your team throughout the entire SDLC, all while staying hands-on with coding.

You'll be involved in the staffing process, onboarding new members, and helping them get comfortable in their new roles. Your key responsibility will be to ensure the team's work fully meets the client's technical expectations.

Explore the client's business domain and applications; familiarize yourself with the Git Flow workflow on the project

Collaborate with BA, PM, and key stakeholders on the client's side to fill in the product backlog

Ensure smooth integration of the team into the client's business processes

Provide continuous mentoring, support, and training to new members of your team

Collaborate with architects, PO, developers, and QAs on the client's side to successfully bring cross-team projects into production

Communicate between team members about evolving requirements and planning

Join the team in producing high-quality code for new features and services, re-writing the existing code, etc.
