Service Operator II - Coiled Tubing

[Apply Now](#)

Company: Halliburton

Location: Villavicencio

Category: construction-and-extraction

We are looking for the right people — people who want to innovate, achieve, grow and lead. We attract and retain the best talent by investing in our employees and empowering them to develop themselves and their careers. Experience the challenges, rewards and opportunity of working for one of the world's largest providers of products and services to the global energy industry.

Under direct supervision, promotes excellent customer relations at the worksite. Performs necessary calculations for the total job at the well site as needed.Coordinates the activities of service operators and operator assistants during the equipment rig up and rig down on a location and the preparation of equipment for performing a job. Provides planning necessary for the job. Ensures customer satisfaction with jobs performed. Responsible for safe crane and rigging operations during the delivery of services. Operates coiled tubing control console including blow-out prevention equipment under supervision. As needed, may perform data collection and data distribution on jobs.Assists with the clean up, repair, and preparation of equipment for the next job. Provides input on individual performance levels of his/her subordinates providing on-the-job skills development to enhance job performance. Job tasks, correctly performed, impact indirectly on cost containment, efficiency, profitability or operations. Consequences of error are easily measured and can be confined. Skills are typically acquired through completion of HAL career development requirements as Service Operator I. Must possess exceptional skills within the service line and have a general understanding of other service functions. Given the nature of oil field service work, the ability

to communicate effectively with others is necessary. Promotes safety awareness and environmental consciousness. Ensures compliance with Health, Safety, and Environmental (HSE) standards, practices and guidelines. Must possess excellent knowledge of Halliburton Management System (HMS) standards, work methods and processes. Licensure to drive commercial vehicles may be required. Promotes and takes an active part in quality improvement processes. Must possess the ability understand to Well Bore schematic, analyze computer programs (Insite for Well Intervention) and operational procedures. Basic computer skills are preferred.
