**Software Engineer (AWS/Mobile)**

**Apply Now**

Company: SOUTHWORKS

Location: Colombia

Category: computer-and-mathematical

## YOUR MISSION

We are looking for a Software Developer with full-stack agile software development skills to help us grow our business by writing code for some of the biggest brands in the world, scale-ups and future industry leaders, and set a new standard for high-quality, high-profile projects.

You will be working as part of an elite three-person Fireteam with other sharp, skilled coders who know how to do top-notch, innovative work in record time to help our customers solve their most vexing technical problems.

## YOUR PROFILE

You have good technical skills and relevant experience with mobile development, using Swift or Kotlin language.

Hands-on work experience with at least any other language like Python, Java, JavaScript, or C# is required (more than one are welcome).

Hands-on work experience with AWS or Azure (not only Virtual Machines usage, but other managed services) would be a plus.

You are familiar with community standards, code guidelines and design patterns.

You have experience building APIs via REST and JSON.

You can understand complex problems and contribute to solutions.

You have good command of English, both written and verbal.

2+ years of experience in a similar position.
