Company: Microsoft

Location: Colombia

Category: computer-and-mathematical

Overview

WE HAVE SEVERAL POSITIONS TO FILL IN LATIN AMERICA - YOU CAN WORK REMOTELY FROM THE COMFORT OF YOUR HOME!

The Microsoft 365 team is looking for software engineers to help design and build one of the fastest growing cloud services in Microsoft.

Do you want to work on a product that ships new features every week? If the answer to these questions is yes, then Microsoft 365 team would like to hear from you!

We build and operate the largest enterprise cloud productivity system in the world. Across products such as Exchange, Teams, and SharePoint, we power communication, sharing, search, intelligent assistance for customers, extensibility through Microsoft Graph, and more. Throughout we maintain very high reliability and availability, strong privacy and compliance for customers, and latency in milliseconds. We apply a combination of approaches from the fields of API design, Machine Learning, Distributed Computing, Workflow engines, Algorithm Optimization, and many more. Come to define, design, and deliver what enterprise cloud productivity means.

More About Microsoft 365

Microsoft 365 is the fastest growing cloud services business in Microsoft. M365 brings together cloud versions of our most trusted communications and collaboration products like Exchange, SharePoint, OneDrive and Teams with the desktop suite of Office products in an always up-to-date integrated service offering. Since its launch, the service has made it easier for millions of information workers across the world in small, medium, and large

enterprises to use the best of Microsoft's business productivity solutions via the cloud. The service now extends the same capability to consumer communication and collaboration products.

Qualifications

Essential qualifications

BS or MS degree in Computer Science or Engineering OR equivalent years of work experience.

At least one year hands on experience in any Object-Oriented coding language such as C++, C#, Java or Python or equivalent experience with C.

Preferred qualifications

Ability to communicate technical details clearly.

Cloud and services experience, with Azure cloud experience highly desirable.

Excellent analytical skills with systematic and structured approach to software design.

Passion for building reliable and well-tested services.

Experience with or exposure to Agile and iterative development processes.

Interpersonal skills

Growth Mindset with a desire to learn, a tendency to embrace challenges, persist in the face of setback, see failures as essential to mastery, learn from criticism and find lessons and inspiration in the success of others.

Help to create a diverse and inclusive culture where everyone can bring their full and authentic self, where all voices are heard, and where we do our best work as a result.

Confident and articulate in expressing ideas to a mixed audience with varying views and challenges.

A sense of personal ownership and accountability is required, together with the ability to develop and deliver to deadlines while managing internal stakeholder expectations.

Self-motivated with a strong drive for reaching across teams and organizations to make progress collaboratively.

Responsibilities

More about your Responsibilities

Software Engineers at Microsoft play an important role in driving the technical details for projects for their product teams. They must be able to design and implement services that are high scale, low latency, always on, low cost to maintain and operate. They work with principal engineers and architects to come up with the right design for their components and help influence the development of common patterns. They have good partnership and influence skills and are motivated and able to collaborate with other engineers and teams.

Key responsibilities

Drive a project through to delivery removing obstacles as needed to ensure success. Contribute to the design of large-scale distributed software services and solutions. Write clean, well-tested code. Champion and drive improvements to team software engineering practices. Mentor junior engineers. Collaborate with related teams to achieve goals. Promote knowledge sharing and contribute to onboarding documentation for new engineers.

Benefits/perks listed below may vary depending on the nature of your employment with Microsoft and the country where you work. Industry leading healthcare Educational resources Discounts on products and services Savings and investments Maternity and paternity leave Generous time away Giving programs Opportunities to network and connect
