Software Engineer II-Outlook App Platform

[Apply Now](#)

Company: Microsoft

Location: Colombia

Category: computer-and-mathematical

Overview

Are you passionate about designing and building world-class application services that power apps for hundreds of millions of users every day? Do you wish to help us scale to over a billion users? Are you excited about providing reliable, scalable, performant and cost-efficient application services? If you have answered a resounding “YES!” to all of the above, then we may have a position for you!

We are the Outlook App Platform Engineering team and currently looking for highly motivated developers who can help build the next generation of application services. We have the unique opportunity to build a modern world-class agile middle tier comprising of Application Gateway, Sync and shared client services like notifications and auth, and Outlook Copilot GenAI Services. all of which can be leveraged by apps across the Microsoft Graph.

We are looking for passionate engineers with experience in product thinking and building E2E systems, and an ability to generate clarity in ambiguous situations, validate ideas and build systems to prove market fit quickly. You will be part of a passionate and creative team working to modernize the way people collaborate and communicate. If you are enthusiastic about partnering and working collaboratively with people across Microsoft, we'd love to chat with you!

We have a strong focus on driving innovation with agility and at the same time we take pride in having the best workplace culture where people can do their best and reach their potential.

Qualifications

Required/Minimum Qualifications

Bachelor's Degree in Computer Science, or related technical discipline with proven experience coding in languages including, but not limited to, C, C++, C#, Java, JavaScript, Swift, Obj-c or Python OR equivalent experience.
