Location: Colombia

Category: computer-and-mathematical

Región Los Lagos Compartir Facebook Empresa Joveo Descripción de la Empresa As the global leader in programmatic job advertising, we are transforming talent sourcing and recruitment media buying for the world's largest and smartest employers, staffing businesses, RPOs, and media agencies. The Joveo platform enables businesses to attract, source, engage, and hire the most relevant candidates on time, within their budget. Powering millions of jobs every day, our data-driven recruitment advertising platform uses advanced data science and machine learning to dynamically manage and optimize talent sourcing and applications across all online channels while providing real-time insights at every step of the job seeker journey, from click to hire. Región Los Lagos Localidad Santiago Tipo de Contratación Tiempo Completo Descripción de la Plaza About the role: Partners with stakeholders to translate complex business or technical problems into end-to-end data tools and solutions (e.g., pipelines, models, tables). This role also leads team efforts to design and develop large-scale data systems (e.g., databases, data warehouses, big data systems), platforms, and infrastructure for various analytics and business applications. About the Team: Uber is redefining the future of grocery & retail! A company that started by transporting people from place to place, now transports nearly anything a customer could want or need, on-demand. The Grocery Engineering Team is responsible for ensuring that as we move to transport more than just people & restaurant food, our platform evolves to provide an outstanding experience for customers, earners and brands. Today this team is focused on grocery, but will continue to flex into a longer tail of categories in the future. Minimum qualifications: PhD or equivalent in Computer Science, Engineering, Mathematics or related

field OR3-years full-time Software Engineering work experience, WHICH INCLUDES 2-years total technical software engineering experience in one or more of the following areas: Programming and scripting language (e.g. Python, SQL, Java/Scala) Big data frameworks (e.g. Spark, Flink, Presto), data modeling, and writing ETLs Designing end-to-end data solutions and architecture Note the 2-years total of specialized software engineering experience may have been gained through education and full-time work experience, additional training, coursework, research, or similar (OR some combination of these). The years of specialized experience are not necessarily in addition to the years of Education & full-time work experience indicated. Technical skills: Required: Data Analytics Data Modeling Big Data Processing Data Storage Systems Distributed Systems We welcome people from all backgrounds who seek the opportunity to help build a future where everyone and everything can move independently. If you have the curiosity, passion, and collaborative spirit, work with us, and let's move the world forward, together. Offices continue to be central to collaboration and Uber's cultural identity. Unless formally approved to work fully remotely, Uber expects employees to spend at least half of their work time in their assigned office. For certain roles, such as those based at green-light hubs, employees are expected to be in-office for 100% of their time. Please speak with your recruiter to better understand in-office expectations for this role.
