## Sr Java Developer (Docker + Kafka)

[Apply Now](#)

Company: Tekton Labs

Location: Bogotá

Category: computer-and-mathematical

We are a US software development company delivering high-quality, cost-effective custom application development to clients worldwide. As a technology consulting company, we also help our clients with their digital transformation process. Currently, we are seeking a Senior Java Developer. Responsibilities: - Design and develop high-volume, low-latency applications for mission-critical systems. - Create well-designed, testable, efficient code. - Participate in all phases of the development lifecycle. - Assist in the preparation and production of releases of software components. - Ensure designs are in compliance with specifications. - Investigate alternatives and technologies and present them for architectural review to support continuous improvement. Requirements: - 4+ years' of experience working in a Java Developer position. - Experience with Docker. - Experience with Kafka. - Proficient in Architecture, Design Patterns, and SOLID Principles. - Experience with TDD, and DDD. - Experience with any Cloud (Azure is preferred). #J-18808-Ljbffr
