

System Engineer

Apply Now

Company: SKYLINE COMMUNICATIONS

Location: Bogotá

Category: computer-and-mathematical

Nice to meet you!

Are you ready to leave your mark on the world? Because we are the **global leading supplier** of end-to-end open **monitoring and orchestration software** for ICT, media and broadband platforms. Basically, our software platform—**called DataMiner**—makes sure that you can order your products online, watch the latest episode of your favorite show, or call your friends whenever you need them.

We're looking for a System Engineer

As a **System Engineer**, you join a squad of talented engineers and support them with the **technical implementation** of DataMiner projects for our users. You are a **contact** for the users on all technical matters, enabling **smooth collaboration** between them and the different departments within Skyline.

At Skyline, we're all about agility. It's a necessary mindset delivering continuity in these fast-changing times. Iterative increments, close collaboration, cross-functional and self-organizing teams, and short feedback loops are just some of the **Agile** ways of working you'll experience while working with us.

SOME OF OUR USERS

DataMiner is deployed by **1500 companies** in over **125 countries** worldwide.

Let's get down to business

A glimpse of your [future]

Transparency is a key value here at Skyline. So let's forget about empty job titles or colorful descriptions for a moment and take a look at what you'd actually be doing here.

You will acquire and maintain detailed knowledge of all **DataMiner** features.

You will help building **key solutions** which are globally recognized and used

You will become a **customer's contact** for technical matters related to your projects

You will have to fully understand all aspects related to the **functional and technical specifications** of your projects

You guarantee the **efficient implementation** of all technical aspects of the projects

You will **troubleshoot** all technical solution issues that affect project delivery

You will perform **quality assurance** from functional perspective on all technical features in your projects

You will create and maintain all required **project documentation** for acceptance, hand-over, and internal presentation procedures

You will help to collect **user stories** of the customer and where required start discussions with other teams/departments

What skills do you require?

Let's dig a bit deeper into the various technical skills you'll need to get started as a System Engineer.

Experience with **markup languages** (XML)

Knowledge of **communication protocols** in general, such as SNMP, HTTP or serial

Knowledge of **databasing** (e.g., Apache Cassandra, Elasticsearch)

Knowledge of **TCP/IP networking multithreading Web Services** (REST, SOAP), and

JSON is a definite plus

Knowledge of **C#** is a plus

Interest in the **telecom** and **broadcast** industry (e.g. HFC broadband, IPTV, broadcast, cable, satellite systems...)

Your [competencies]

You'll be working in a highly technical environment prone to constant change and evolution.

On top of that, you'll have to collaborate with a great many (marvelous) people. All very exciting!

But it also calls for a special kind of mind- and skillset.

You are a fast learner and **adapt quickly** to new situations

You have a positive **can-do** attitude and are a team player

You are **communicative** and have effective interpersonal and organizational skills

You think logically and always keep the **client's needs** in mind

You have natural **technical insight** and are passionate about the benefits of software technology

You can work independently and prioritize tasks

You have good verbal and written communications skills in **English**

You have a bachelor's, master's or doctorate degree in ICT, Software and/or Telecom
