Description

Test Automation Engineer

Bogota, Colombia

ONLY CVs SUBMITTED IN ENGLISH WILL BE CONSIDERED

The Opportunity:

Anthology offers the largest EdTech ecosystem on a global scale, supporting over 150 million users in 80 countries. Our mission is to provide dynamic, data-informed experiences to the global education community so that learners and educators can achieve their goals.

We believe in the power of a truly diverse and inclusive workforce. As we expand globally, we are committed to making diversity, inclusion, and belonging a foundational part of not only our hiring practices but who we are as a company.

For more information about Anthology and our career opportunities, please visit anthology.

As Test Automation Engineer, you'll focus on providing support for test development and execution against Anthology's new feature and legacy system releases. You will become an active member of an agile team of developers participating in daily stand-ups, design sessions, code reviews, and sprint demos. You will create and maintain automation frameworks and testing tools. You'll develop the test strategy for features, incorporating the right balance of unit tests, integration/API tests, and UI tests. You will design, implement, and maintain complex testing environments, performing all aspects of verification including functional, regression, load, and system testing as well as documentation. You will work in a Scrum team

focused on building functionality for Anthology's Blackboard Learn applications.

The Candidate:

Required skills/qualifications:

At least 2 years of experience in QA manual testing and automation

Experience developing test automation scripts for web applications and REST APIs

Experience with test automation tools and frameworks such as Selenium, Webdriver IO, Protractor, and TypeScript

Familiarity with Java, JavaScript, HTML, and CSS

A technical understanding of database configuration and ability to write complex SQL queries

Light experience with one or more scripting languages like shell or bash

Light experience with REST APIs, JavaScript, XML, JSON

Familiarity with build environments like Jenkins, Docker and Mesos

Fluency in written and spoken English at CEF B2 level or above

The Office:

We have an office located in Bogota, Colombia as a hub for the LAC market.

Located in Capital Towers center in the financial district

Excellent and secure area to eat lunch, have a walk, or dine after office hours

Benefits in prepaid medicine, dental plan, and wellness allowance

Easy access to public transportation close to two important avenues, Carrera 7 and Calle 100

Free parking for employees and paid parking for visitors

Multiple private spaces for virtual and face-to-face meetings

Regular events like bring your dog to work day and ping-pong, foosball, and Mario Kart tournaments

Sodexo card provided for employees

Daily budget to spend on beverage vending machines

This job description is not designed to contain a comprehensive listing of activities, duties, or responsibilities that are required. Nothing in this job description restricts management's right to assign or reassign duties and responsibilities at any time.

Anthology is an equal employment opportunity/affirmative action employer and considers qualified applicants for employment without regard to race, gender, age, color, religion, national origin, marital status, disability, sexual orientation, gender identity/expression, protected military/veteran status, or any other legally protected factor.
